Virtual Visit Management

Add a Third User to a Conversation

1. To add a third user to a conversation, you must be in an active Virtual Visit with a patient. Click on the "Add Party" button.

2. Enter the third party's mobile number and select invite to send a secure link to the conversation. Or send the secure link that is generated via email.

Virtual Visit Management

3. The third party must open the SMS or email link to enter the call. They can enter the call via a mobile device or computer.

4. All participants will share the screen and the conversation will end when all parties close their call.
