- QliqCHAT for Mac
- QliqCHAT for Windows
- QliqCHAT for iPhone/iPad
- QliqCHAT for Android
- QliqDIRECT
- QliqSTOR

What's New

N/A

Improvements

N/A

Bug Fixes

1. **Chat Bots:** Chatbots now completely deliver entire conversations without disruption.
2. **Virtual Visits:** Participants can now leave a video call without disrupting the session for other attendees.
3. **Virtual Conversations/+Chat:** PDF previews now display cleanly without the redundant toolbar
4. **Virtual Conversations/+Chat:** The texting character input limit now dynamically adjusts based on whether MMS is enabled for a chat widget. If SMS (default) the character limit in the message is 250 characters. If MMS is enabled the character limit is 1000.
5. **Virtual Conversations/+Chat:** For mobile users, the confirmation screen will no longer persist after an invitation is successfully sent.
